Hi Linda & Neil,

You're very welcome, no problem at all.  
I'll pass on your thanks also.

Kind Regards

Carwyn

Hello Carwyn

Thank you for this email I'm very grateful. Thank you and Ollie also for the site visit in such bad weather too. I'm sorry you got so wet. You were both very helpful and informative and it was great to hear the different options and possibilities. We prefer not moving any wires or poles and leaving as is if able. Thank you to Anthony and Dorian too. Will be in touch soon. You've been brilliant, thank you.

Kindest regards

Linda and Neil Evans.

Good Afternoon Linda

It was good to meet you on-site on Tuesday (11/04/23)

To summarise our site meeting ;

We established that there's an 11kV pole on your land with associated 11kV overhead conductor crossing the proposed development site.

As discussed we believe it would be beneficial to get some site plans/drawings made to get an idea of the site layout and to establish whether the line would need to be moved, or whether the site layout could work around the electrical assets.

To move or divert the line, my colleague Ollie (who you also met on-site) would need to conduct and overhead line survey to establish what works are required in diverting the line, and possibly gain permission from 3<sup>rd</sup> party landowners nearby to alter the angle of the stay wires, and pole positions. I would then conduct the design, and quote the costs associated.

We're happy to work with your architect on this when things develop further.

In terms of Electrical connections to the houses, there is Low Voltage network nearby, but whether this would be sufficient will depend on the load required to each individual house when we receive an application form for the connections. An application form can be found on our website at [www.nationalgrid.co.uk](http://www.nationalgrid.co.uk)

In the meantime should you have any questions, please don't hesitate to contact me.

Kind Regards

Carwyn
