Dear Gary here are my objections to the LDP

Infrastructure

We do not have a comprehensive bus service that links Llangennech effectively with either Carmarthen, Swansea or Llanelli . Therefore will be more people commuting out of the village. The junction ti M4 top of the village is congested most mornings from 7-5o to at least 8-45. traffic past the school is necessarily slow but the volume of cars turning on junctions is already alarming. Does the school have the capacity to cope with influx ? What is the impact on Welsh language provision ? Will they have bilingual streams and what then the implications for teaching !

What resources are there in Llangennech ti support new families? The GP surgery is a sole GP surgery and sited in a narrow road. Is there capacity to expand and enhance GO surgery? It's hard enough now to get appointments within a reasonable amount of time. Health visitors midwifery appointments?

Turning to Bryn. Despite signage drop off and pick up times at school are hazardous and dangerous. Drivers negotiate speed bumps parents door openers random children and double parking. Does this school have the capacity to expand and provide safe routes for children. Is there adequate transport provision for additional families to the secondary schools? Who will fund the necessary change

From an ecological point of view this move will bring more commuters and impact on the environment in multiple ways: loss of woodland and green spaces , more vehicles travelling through the village and pit anti ally hazardous situations in and around the schools.

Also the people to be relocated how are they to be integrated effectively in Welsh communities. The housing crisis in North Wales is a prime example. What will be the effect on the agricultural pockets of land around Llangennech. Once lost they will never be recovered . This is not NIMBYism . We have a duty to preserve our woodlands forests and farms. What will why he carbon cost of all this proposed development.

I object for all the reasons above

I hope you are recovering Gary and that you remain well . Thank you for your hard work

Anne Phillips
