

**Subject:** Ecological Survey work.

This site has been surveyed in the past by Wildwood Ecology. Unfortunately, the surveys are now all out of date and will need to be updated. As we are still outside of the recognised survey period for most ecological work, any updated surveys will be undertaken later in the year.

The information within the existing reports are only a few years old so there is unlikely to be any major changes to the findings of new surveys. I&G Ecological Consulting Ltd have outlined what survey work is required for this site and the survey work will be undertaken at the appropriate time of year to ensure that findings are correct and follow recognised timings and seasons etc.

For any further information regarding proposed surveys etc please contact I&G Ecological Consulting Ltd.

Yours sincerely.
